

JOAN
Meeting Room
Assistant

reddot award 2016
winner

Extremely pleased with the devices, exactly what we were looking for. System is super easy to use.

Brian Arsenault
LabConnect LLC

Initial responses to the quality and user-friendliness have been very positive from users. From an admin side, the backend was easy to setup, and easier to follow along. Very intuitive.

CommsPartner

The new era of meeting room signage.

Joan Meeting Room Assistant is an eco-designed digital door label and meeting room scheduling solution. Joan was developed exclusively for room booking signage. It connects to your existing Wi-Fi network and the online calendars already in use, is installed in just minutes, and requires no cables, making it easily attached to any surface.

The greenest digital door label

Joan is the greenest and most advanced digital door label on the market with minimal power consumption. It uses 99% less power than other digital door labels, resulting in amazing energy savings.

Extreme power efficiency

Easy mounting

Amazing display

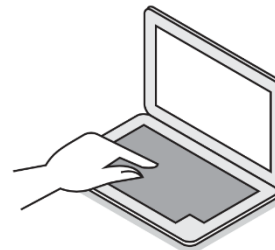

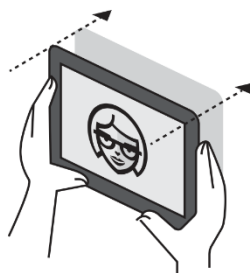

Effortless connectivity

Plug & play

Designed exclusively for labeling and managing meeting rooms, Joan delivers out-of-the-box support for standard office calendars, including **Office 365, Microsoft Exchange, Google Apps, and iCal.** The eco-friendly Joan provides cutting edge functionality while greatly decreasing the energy consumption and substantially improving office productivity.

1-2-3 SETUP

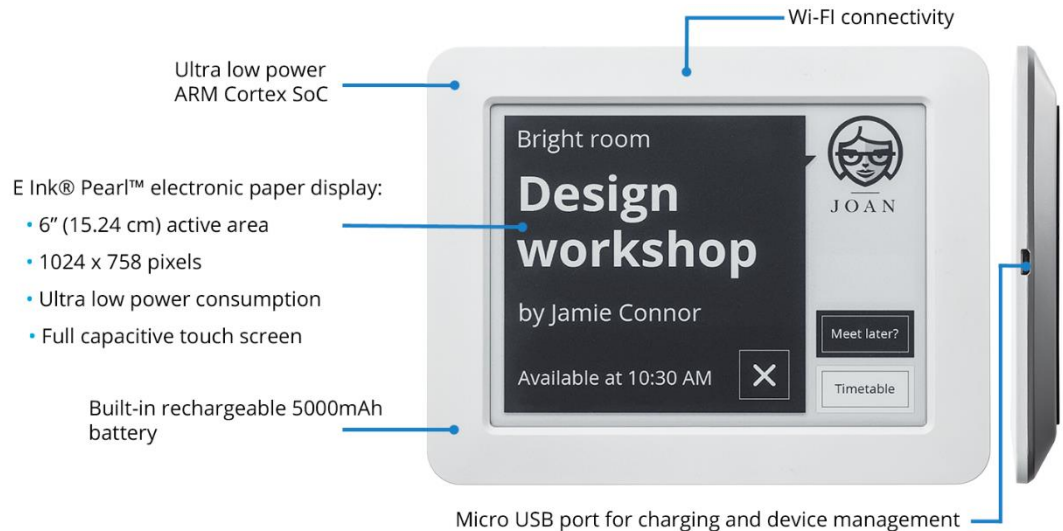

Perfect signage technology

Joan is a next generation room booking device that has been developed especially for room signage. It features an E Ink® e-paper display and is powered by advanced Visionect technology. The product of years of research and development in energy efficient signage, Joan is based on a perfect signage display with a 180° viewing angle, great visibility, and no glare – even in direct sunlight.

Engineered for meeting rooms

Joan is a frontrunner in the conference room booking solutions and meeting room digital signage industry. The fundamentals of Joan's concept are accessible prices, made possible by Joan's bottom-up design created exclusively for meeting room signage. Joan's recommended retail price is ZAR 8,999 ex. 14% VAT.

Joan's first users

ABOUT JOAN. Joan Meeting Room Assistant is an eco-designed digital door label and meeting room scheduling solution developed by Visionect, a global market leader in electronic paper signage. Joan was designed exclusively for room booking signage: it connects to the existing Wi-Fi network and the online calendars already in use, is installed in just minutes and requires no cables, making it easily attached to any surface. Joan, the recipient of the Red Dot 2016 and CES 2016 Innovation Awards, is the most advanced and greenest digital door label on the market with a power consumption 99% lower than other room booking signage solutions. joanassistant.com

ABOUT VISIONECT. Visionect has developed an ultra-low power display platform that uses 99% less power of LCD or LED technologies, and enables the use of digital displays in environments before not possible. An E Ink® display powered by the advanced Visionect Platform is a state-of-the-art signage technology unparalleled when it comes to energy efficiency and display visibility. This low power signage technology is already being used by more than 500 companies across all continents, and is setting a new standard in digital signage industry. www.visionect.com
